10. The Abteilung Hilfsmaterialien handles procurement for Abteilung Chemie of certain laboratory equipment and instruments as well as the procurement of all containers used by Wismut. Container orders are handled only by Soviet nationals. Until recently containers for one were sent to Wismut from the Soviet Union (sic). They are of cylindrical shape and are made of strong cardboard, about 2 centimeters in thickness, with a heavily waxed inner surface. At present, part of the containers are produced in East Germany at a plant especially built for this purpose in Baierfeld in the Ersgebirge.
